The following technical data on the previously reported novel rocket launcher was obtained in December 1949*:

1. The "TR" truck manufactured by the Mavag Plant, Gyoer (P 48/Y 44), is an improved version of the heavy-duty "Bulldog" truck (1.5 meters longer chassis frame). The "TR" truck is powered by an 80-HP 6-cylinder Diesel motor. About 240 trucks of this type had been completed and accepted by a Soviet commission by mid-September 1949.
2. The rockets launched during the demonstration on 5 September 1949 were fired at a distance of 5 to 6 km.
